

Lux Yoga

Toronto, Canada • Open to Remote / Relocation

luxman.yoga@gmail.com | [linkedin.com/in/luxyoga](https://www.linkedin.com/in/luxyoga) | github.com/luxyoga | lux-data.vercel.app

Data professional with 5+ years building, modeling, and analyzing data across product, revenue, and operational domains. Designed and deployed a natural-language-to-SQL application over **228,000+ records** and an end-to-end pipeline processing **194M+ records** with Airflow, PySpark, and Docker.

Strong SQL and data-modeling foundation, moving toward analytics engineering and pipeline development.

PMP and AWS certified, with delivery experience across remote, cross-functional teams in Canadian and international (Copenhagen) organizations.

Native English speaker, learning Danish (A2)

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, PySpark), SQL (PostgreSQL, MySQL)

Data Engineering & Pipelines: Airflow (orchestration), PySpark, ETL/ELT design, data modeling, data cleaning & validation, Docker

Cloud & Warehousing: AWS, Snowflake, DuckDB

BI & Analytics: Power BI, Tableau, Excel (Advanced), Google Analytics, KPI definition, dashboard design, EDA

AI & LLM Tooling: Claude API, LLM integration, prompt engineering, NL-to-SQL

Tools & Collaboration: Git, JIRA, Notion, Confluence, Slack

Currently learning: dbt, AWS Solutions Architect Associate (SAA-C03), Databricks Data Engineer Associate

WORK EXPERIENCE

Data Engineer/ Data Systems Consultant

Lux Data Systems

01/2026 - Present

Toronto, Canada

- Building full-stack data products to solve business problems for small to medium sized businesses in Toronto.
- Design and build end-to-end data pipelines and systems, taking raw data through ingestion, transformation, modeling, and serving into production-ready data products.
- Work hands-on across the modern data stack, including orchestration, warehousing, dbt, and cloud, while pursuing the AWS Solutions Architect Associate and Databricks Data Engineering certifications.

Data Analyst

JD Sports Fashion (Contract, Remote)

06/2025 - 12/2025

Copenhagen, Denmark

- Modeled and queried retail datasets across 100+ EU and NA stores in SQL, building Tableau dashboards on sell-through, margin, and store KPIs that guided merchandising and pricing.
- Automated 10+ Tableau dashboards using SQL and scheduled refreshes, improving reporting efficiency 30%+ and giving distributed commercial teams faster access to performance data.
- Delivered margin and profitability analysis across 7-figure revenue lines in 12 markets using SQL and Excel, informing pricing and promotional strategy.

- Ran sentiment analysis on 650K+ product-interaction events with AWS Comprehend and Python, surfacing customer feedback to drive feature-adoption and roadmap decisions.
- Defined and standardized KPIs across 10+ product launches with Product and Marketing, building the metric definitions the team prioritized against.
- Built Power BI dashboards tracking NPS, churn, and ARR by segment, cutting ad-hoc reporting 25%+.

- Built ETL workflows integrating SAP and Deltek ERP systems, standardizing project and CRM data for financial reporting across 50+ architectural projects.
- Unified billing and accounting data from multiple source systems using SQL, cutting reporting turnaround 30% and improving profitability visibility.
- Created interactive reports used by 20+ stakeholders to track revenue trends, project profitability, and ROI.

DATA PROJECTS

Copenhagen Bike & Weather Pipeline

Airflow • PySpark • PostgreSQL • Streamlit • Docker

- Built an end-to-end ETL pipeline ingesting and processing 194M+ records into clean, modeled, reusable datasets supporting long-term trend analysis.
- Orchestrated scheduled workflows in Airflow and used PySpark for distributed processing across the full record volume.
- Modeled cleaned data in PostgreSQL and containerized the stack with Docker for reproducible runs.

Toronto Permit Pulse: Natural Language to SQL (NL-to-SQL) App

Python • Claude API • DuckDB • Streamlit

- Built and deployed a production NL-to-SQL app letting users query 228,000+ City of Toronto building permits in plain English, powered by the Claude API over a multi-table DuckDB schema.
- Designed the multi-table schema and query layer that translates natural language into validated SQL.

Retail Sales Analysis: 10-Year Trends Across EU, UK & NA

Tableau • SQL • Excel • Data Modeling • Data Visualization

- Modeled 100K+ records across 4 datasets into a 10-year footwear sales dashboard analyzing YoY sales, profit, and volume trends.

EDUCATION AND CERTIFICATIONS

- | | |
|--|-------------|
| • B.Sc Honours Science (Minors: Economics & Biology), University of Waterloo | 2015 |
| • AWS Certified AI Practitioner, Amazon Web Services | 2026 |
| • AWS Solutions Architect Associate (SAA-C03) | In progress |
| • Google Data Analytics Professional Certificate, Coursera | 2025 |
| • Project Management Professional (PMP), PMI | 2024 |
| • User Experience Design & Front-End Web Development, University of Toronto | 2018 |
